AIR CURTAIN ??

An air curtain, also known as air door, is a machine that blows a controlled stream of air across an opening to the other side to create an air seal. This seal separates different environments while allowing a smooth, uninterrupted flow of traffic and unobstructed vision through the opening.

Open door effects:

Opening the door makes it easier for customer to access and increases sale

Blocking effect:

It prevents smoke, dust, odor and insects from entering through the entrance

Increases safety:

It helps to prevent condensation and moisture deposit on the metal grill

Increases air efficiency:

It prevents hot air in summer and cold air in winter which protects indoor air

Energy saving:

Saves up to 33%

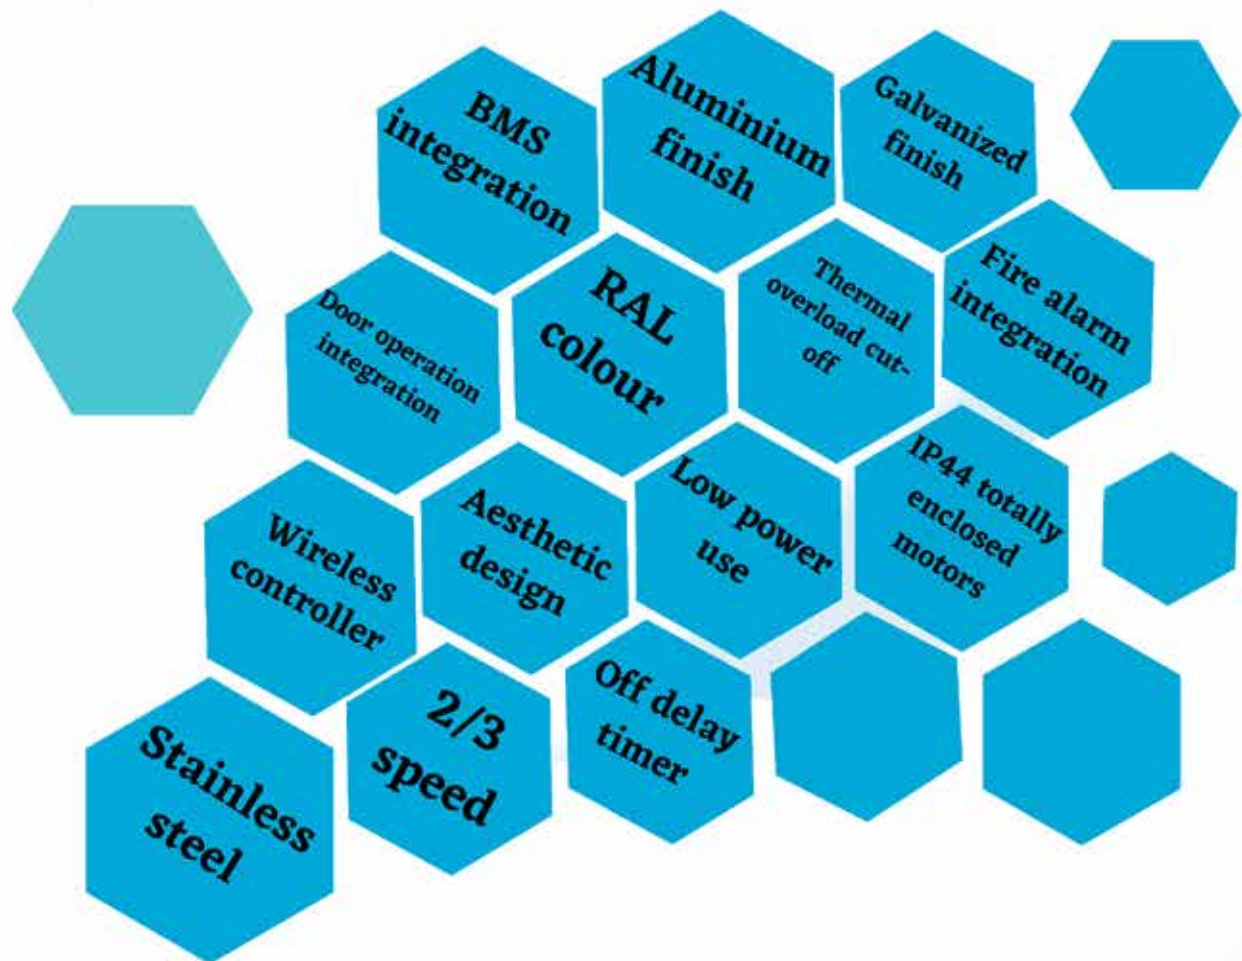

Air circulation:

It effectively circulate air in large space by creating air stream
